APPENDIX G

Index of Waste Plan Policies

APPENDIX G

Policy A1 Section 3.1.6

Policy:

- A1. Take measures to ensure the best overall environmental outcome by applying the waste hierarchy to the management of waste streams.

Policy A2 Section 3.1.6

Policy:

- A2. Implement the polluter pays principle across all waste services and regulatory activities in a manner appropriately reflecting the risk to the environment and human health.

Policy A3 Section 3.3

Policy:

- A3. Contribute to the improvement of management performance across all waste streams through the implementation of policy actions and monitor progress towards national targets.

Policy A4 Section 4.3

Policy:

- A4. Aim to improve regional and national self-sufficiency of waste management infrastructure for the reprocessing and recovery of particular waste streams, such as mixed municipal waste, in accordance with the proximity principle. The future application of any national economic or policy instrument to achieve this policy shall be supported.

Policy B1 Section 8.1.2

Policy:

- B1. Local authorities in the region will ensure that the resources required to implement waste prevention activities are available through the lifetime of the plan.

Policy B2 Section 8.1.2

Policy:

- B2. Promote behavioural change and extend waste prevention activities through information campaigns, targeted training and local capacity building, working with households, communities, schools, business, and other public institutions.

Policy B3 Section 8.3.7

Policy:

- B3. Build and maintain a strong partnership with the National Waste Prevention Programme.

Policy B4 Section 8.3.7

Policy:

- B4. Harmonise prevention activities in the region to link with the national hazardous management plan, producer responsibility operators and other related programmes (such as litter, sludge, water etc).

Policy C1 Section 8.2.5

Policy:

- C1. Establish reuse, repair, and preparing for reuse activities and networks to recirculate and extend the lifespan of items.

Policy C2 Section 12.2.1

Policy:

- C2. Optimise the value of recycled and residual waste resources in the system to turn these materials into reliable sources of secondary raw materials for reprocessing and recovery.

Policy C3 Section 12.2.1

Policy:

- C3. Identify and promote the growth of secondary material markets and enterprises in the region through regional and local supports.

Policy C4 Section 4.4

Policy:

- C4. Contribute to the greening of public procurement in local authorities through the inclusion of resource efficient criteria in all tendering processes related to waste plan activities.

Policy C5 Section 17.2.10

Policy:

- C5. Work with and through business support agencies and the National Waste Prevention Programme to encourage business and industry to implement resource efficiency principles including the use of clean technologies and preventing waste at source.

Policy D1 Section 17.2.1

Policy:

- D1. The lead authority on behalf of the region will participate in the national coordination committee for waste management planning and other national groups relevant to the implementation of the waste management plan.

Policy D2 Section 17.2.2

Policy:

- D2. The Lead authority and local authorities will work together on the structures required to implement the waste plan, capacity building, training and knowledge share on delivering waste management activities.

Policy D3 Section 17.9

Policy:

- D3. Foster links and activities with relevant stakeholders including businesses and Industry Groups, NGOs and other relevant networks (including cross-border networks) to extend the reach of the plan.

Policy D4 Section 18.6

Policy:

- D4. Work with key stakeholders, including government and industry operators, on the funding of local authority waste activities in the region and co-ordinate applications for relevant national and European funding.

Policies E1 & E2 Section 16.4.1

Policies:

- E1. Future authorisations by the local authorities, the EPA and An Bord Pleanála of pre-treatment capacity in the region must take account of the authorised and available capacity in the market while being satisfied the type of processing activity being proposed meets the requirements of policy E2.
- E2. The future authorisation of pre-treatment activities by local authorities over the plan period will be contingent on the operator demonstrating that the treatment is necessary and the proposed activities will improve the quality and add value to the output materials generated at the site.

Policies:

- E3a. The local authorities in the region will maintain and develop their existing networks of bring infrastructure (e.g. civic amenity facilities, bring banks) to facilitate the recycling and recovery of hazardous and non-hazardous municipal wastes.
- E3b. The Plan supports the development by the private sector of public bring infrastructure (e.g. civic amenity facilities, bring banks) subject to appropriate statutory approvals and in line with appropriate environmental protection criteria.
- E4. The local authorities may include as a condition of planning that developers of commercial and large-scale residential developments provide bring facilities to serve occupants and residents.
- E5. Local authorities will explore the possibility of accepting hazardous waste at existing civic amenity facilities from small businesses, which is similar in nature to household hazardous wastes currently received. A charge may be introduced for such a service.
- E6. The local authorities may require waste developers seeking a waste facility permit to develop a Class 10 waste treatment activity, as defined by the Third Schedule: Part I of the Waste Management (Facility Permit and Registration) Regulations 2007 (as amended), to provide bring facilities for the acceptance of non-hazardous wastes from members of the public and businesses.
- E7. The local authorities in the region will continue to work with the EPA and other key stakeholders to support the collection of hazardous farm waste from designated bring centres e.g. marts.

Policies:

- E8. The waste plan supports the development of disposal capacity for the treatment of hazardous and non-hazardous wastes at existing landfill facilities in the region subject to the appropriate statutory approvals being granted in line with the appropriate environmental protection criteria.
- E9a. The on-going availability of disposal facilities for non-hazardous municipal residual wastes in the region will be required during the plan period. The local authorities consider there is no need to provide additional disposal facilities for residual wastes over and above the existing authorised (i.e. operational, inactive or uncommenced) facilities in place.
- E9b. The waste plan supports the need for on-going disposal capacity to be developed for on-site generated non-hazardous/hazardous industrial waste over the plan period.
- E10. The waste plan recognises the need for on-going disposal capacity to be available in response to events which pose a risk to the environment and/or health of humans & livestock. The local authorities of each region will monitor available contingency capacity annually.
- E11. The plan supports the consideration of appropriate alternative future land uses at authorised inactive landfills (un-commenced; permanently-closed; or temporarily-closed) - subject to amendments of existing approvals being put in place. Any development proposals shall be subject to Appropriate Assessment Screening in accordance with the requirements of the EU Habitats Directive to ensure protection and preservation of the Natura 2000 Network.

Potential activities include:

- Waste treatment activities including pre-treatment, thermal recovery, biological treatment, reprocessing or preparing for re-use;
 - On-site temporary storage of waste and materials;
 - Co-location of utility services such as wind farms or other energy generating activities;
 - Development of public and recreational amenities;
 - Co-locating recycling / reuse waste enterprises on site; and
 - Resource mining;
 - Contingency capacity for crisis events such as risks to the environment and to the health of humans and livestock
- E12. The waste plan supports the repatriation of residual waste illegally disposed in Northern Ireland to licensed disposal facilities appointed to a framework set up on behalf of the State by the National Trans Frontier Shipment Office.

Policies E13-E14 Section 16.4.4

Policies:

- E13. Future authorisations by the local authorities, the EPA and An Bord Pleanála must take account of the scale and availability of existing back filling capacity.
- E14. The local authorities will co-ordinate the future authorisations of backfilling sites in the region to ensure balanced development serves local and regional needs with a preference for large restoration sites ahead of smaller scale sites with shorter life spans. All proposed sites for backfilling activities must comply with environmental protection criteria set out in the plan.

Policies E15a-E16 Section 16.4.5

Policies:

- E15a. The waste plan supports the development of up to 300,000 tonnes of additional thermal recovery capacity for the treatment of non-hazardous wastes nationally to ensure there is adequate active and competitive treatment in the market and the State's self sufficiency requirements for the recovery of municipal waste are met. This capacity is a national treatment need and is not specific to the region. The extent of capacity determined reflects the predicted needs of the residual waste market to 2030 at the time of preparing the waste plan. Authorisations above this threshold will only be granted if the applicant justifies and verifies the need for the capacity, and the authorities are satisfied it complies with national and regional waste policies and does not pose a risk to future recycling targets. All proposed sites for thermal recovery must comply with the environmental protection criteria set out in the plan.
- E15b. The waste plan supports the need for thermal recovery capacity to be developed specifically for the on-site treatment of industrial process wastes and where justifiable the treatment of such wastes at merchant thermal recovery facilities.
- E16. The waste plan supports the development of up to 50,000 tonnes of additional thermal recovery capacity for the treatment of hazardous wastes nationally to ensure that there is adequate active and competitive treatment in the market to facilitate self-sufficiency needs where it is technically, economically and environmentally feasible. The capacity is a national treatment need and is not specific to the region. All proposed sites for thermal recovery must comply with the environmental protection criteria set out in the plan.

Policies E17-E18 Section 16.4.6

Policies:

- E17. The waste plan supports the development of at least 40,000 tonnes of additional biological treatment capacity in the region for the treatment of bio-wastes (food waste and green waste) primarily from the region to ensure there is adequate active and competitive treatment in the market. The development of such treatment facilities needs to comply with the relevant environmental protection criteria in the plan.
- E18. The waste plan supports the development of biological treatment capacity in the region in particular anaerobic digestion; to primarily treat suitable agri-wastes and other organic wastes including industrial organic waste. The development of such treatment facilities needs to comply with the relevant environmental protection criteria in the plan.

Policy E19 Section 16.4.7

Policies:

- E19. The waste plan supports the development of indigenous reprocessing and recycling capacity for the treatment of non-hazardous and hazardous wastes where technically, economically and environmentally practicable. The relevant environmental protection criteria for the planning and development of such activities need to be applied.

Policy E20 Section 16.4.8

Policies:

- E20. The waste plan supports the development of repair and preparing for reuse enterprises in the region as part of the transition to a more resource focused management approach and will provide technical, regulatory and financial guidance to operators active on this tier of the hierarchy.

Policy E21 Section 16.4.9

Policies:

- E21. The Local Authorities will review the approach to authorising waste treatment facilities requiring a waste facility permit or certificate of registration having regard to the need to achieve consistency of approach between planning approval and operational capacity.

Policy E22a-E22b Section 16.4.10

Policies:

- E22a. The plan supports the primacy of kerbside source segregated collection of household and commercial waste as the best method to ensure the quality of waste presented.
- E22b. The plan also supports the use of authorised civic amenity facilities and bring centres as part of the integrated collection system.

Policy E23 Section 16.4.10

Policy:

- E23. In the absence of kerbside source segregated collection services and where the proximity of the civic amenity facilities and bring centres is prohibitive the plan supports localised collection solutions such as community drop-off points or pay-to-use systems subject to compliance with the household waste collection regulations.

Policy E24 Section 16.4.10

Policy:

E24. The plan supports the appropriate management of international catering waste under the Animal By-products Regulations (EC) No. 1069/2009.

Policy E25 Section 16.4.10

Policy:

E25. The plan supports the improvement of existing PRIs and the development of new PRIs or similar industry/voluntary schemes for specific waste streams including but not limited to human and farm chemicals and medicines, paints, newspapers, magazines and bulky waste.

Policy F1 Section 9.2.5

Policy:

F1. Enhance the enforcement of regulations related to household waste to ensure householders, including apartment residents, and owners are managing waste in accordance with legislation and waste collectors are in compliance with regulatory requirements and collection permit conditions.

Policy F2 Section 14.2.2

Policy:

F2. Enforce all waste regulations through increased monitoring activities, and enforcement actions for non-compliance with authorisations and regulatory obligations.

Policy F3 Section 14.2.2

Policy:

- F3. Take measures to prevent and cease unauthorised waste activities by way of investigation, notifications, remediation requests or legal action as appropriate.

Policy F4 Section 16.3

Policy:

- F4. Improve the consistency of local authority waste authorisations and conditions issued to waste collectors and facility operators.

Policy G1 Section 18.6

Policy:

- G1. Ensure the highest environmental and human health benefits are achieved by prioritising the implementation of the upper tiers of the waste hierarchy and ensuring these actions are funded appropriately .

Policy G2 Section 13.3.1

Policy:

- G2. Roll-out the plan for remediating historic closed landfills prioritising actions to those sites which are the highest risk to the environment and human health.

Policy G3 Section 16.5

Policy:

- G3. Ensure there is a consistent approach to the protection of the environment and communities through the authorisation of locations for the treatment of wastes.

Policy G4 Section 9.4

Policy:

- G4. Implement a co-ordinated approach to address unmanaged waste and the potential impact to the environment and human health.

Policy G5 Section 16.5

Policy:

- G5. Ensure that the implementation of the regional waste management plan does not prevent achievement of the conservation objectives of sites afforded protection under the EU Habitats and Birds Directives.

Policy H1 Section 7.1.16

Policy:

- H1. Work with the relevant stakeholders and take measures to ensure systems and facilities are in place for the safe and sustainable management of sludges (sewage, waterworks, agricultural, industrial, and septic tank) generated in the region having due regard to environmental legislation and prevailing national guidance documents, particularly in relation to the EU Habitats and Birds Directives.

Policy H2 Section 7.1.16

Policy:

- H2. Investigate the opportunity to establish and expand management schemes for particular hazardous and non-hazardous waste streams including (but not limited to) paints, medicines, mattresses, other bulky wastes, agricultural and horticultural chemicals and waste oils (where technically, environmentally, and economically practicable).

Policy H3 Section 17.2.1

Policy:

- H3. Co-operate and input into the setting up of new national producer responsibility schemes (statutory or voluntary) for waste streams to ensure the role of local authorities is clear and can be practically achieved.
